Ed:

Since this agreement has nothing to do with the criminal investigation, we would definitely need to talk with CSB and OSHA on their estimate of time to complete their civil investigations concerning the incident pending the completion of the criminal investigative activities on-site. I know the CSB is working closely with ATF so they have probably already started their portion of their civil investigation but I am not sure if OSHA has the same access to the site as CSB. One of us can certainly contact OSHA and CSB to get a rough timeframe.

Thanks
Gary Moore

Hi Gary,

As you can see from Mr. Schoen's e-mail below, he suggests we ask Mr. Jack Rector directly about the time frame. Have you had a chance to speak with him or the folks on-site from the ATF? I don't have an attorney contact at the ATF, but I can ask our CID attorney for it if Mr. Rector or the on-site ATF personnel can't give you a time frame.

Good morning, Ed. I will be working with OSHA to assist in the evidence agreement to extent necessary, but at this stage, you will be best served in dealing directly with Mr. Rector on questions of the type posed below relating

to actual investigation efforts and process. I understand that ATF is still in control of the site and issues such as cleanup and/or response are subject to their directions and discretion. I spoke with Mr. Rector briefly this morning and he can probably fill you in more thoroughly on that score.

Thanks and look forward to working with your office.

Hi Michael,

I understand you're the attorney with DOL who provided a draft proposed "preservation of evidence" agreement? EPA is currently reviewing the draft and will provide comments to you and Jack Rector shortly.

In the meantime, however, do you or Mr. Rector know of a timeframe on when OSHA and the Chemical Safety Board will complete their Incident Cause Investigations? The reason I ask is because the EPA and TCEQ On-Scene Coordinators would like to have a timeframe to better plan the initiation of much needed cleanup and response efforts.

Thanks,

Edwin,

The SOL is not specifically assigned to this case or the site at this time, he was just asked to help with the Evidence and Site Control Agreement for OSHA. He can be reached through his e-mail at schoen.michael@dol.gov

No problem, Jack. I was able to do a copy and paste into Word.

Would you please give me the name and contact info of the OSHA attorney assigned to this Site?

I did not get a copy in word from our solicitor's office. If there are any changes and additions you would like, please list them on a word document and I will have our SOL compile all the changes from each Agency into one draft form. After all the Agencies respond, we will compile and send out the draft again for review. Thanks....

Hi Jack,

Would you happen to have the draft agreement in Word or Wordperfect format? If so, would you please send me the draft in that format? Thanks,

Ed:

Could you please review this Evidence and Site Control Agreement prepared by OSHA for the group. This issue is how to preserve evidence and site control so that actions taken by the various agencies do not impact the evidence on the site.

I do not necessarily think that we will be doing any evidence collection activities but may need to collect on-site samples. It appears that TCEQ wants the lead on the cleanup activities on the site should the RP decide not to do such actions. They intend on issuing a demand letter to the owner very soon.

Please review this agreement with our managers and make whatever modifications need to be made to this agreement for us to be a party if we determine that we may take some actions on the site.

Thanks

All,

Attached is a working draft of an evidence and site control agreement for this matter. It is modeled after some others OSHA has used in prior cases, however, we will need to come up with some more precise definitional items, e.g., the exclusion zone in paragraph A.1.a and/or paragraph C.8.a (dealing with steps for evidence collection removal steps that are specific to this situation). Please look it over and let me know what changes, additions, etc. everyone would like to see. I will compile those into one agreement and send out for everyone's approval. Thanks...

Jack Rector
